INDÚSTRIA E COMÉRCIO DE FERRAGENS EIRELI

CATÁLOGO
LINHA COMPLETA DE

ACESSÓRIOS PARA VIDRO

Conheça mais em www.perficolor.com.br | facebook.com/Perficolor

A EMPRESA

Fundada em 2010 com o intuito de atuar em duas áreas, desenvolvimento de acessórios para vidro e prestação de serviços de pintura, a Perficolor, em função da expansão do mercado de construção civil, opta dar mais ênfase no desenvolvimento de acessórios para vidro. A fim de atender as exigências de seus clientes, a empresa planejou todo seu parque industrial, de forma a aumentar sua produtividade e manter um alto padrão de qualidade em seus serviços.

A Perficolor é uma empresa que tem como diferencial a qualidade de seus produtos, mantendo-se assim de forma competitiva no mercado. Buscando inovar, preocupa-se com a extensão de seus serviços, criando para isso canais de comunicação com seus clientes. Conheça mais sobre a empresa: www.facebook.com/Perficolor e www.perficolor.com.br

O CATÁLOGO

Este catálogo foi desenvolvido com o objetivo de aproximar a Perficolor de seus clientes. Foi pensado cuidadosamente para que todos os detalhes atendessem aos mais exigentes olhares e desejos. Preocupou-se em facilitar a realização dos pedidos, compreensão e reconhecimento dos produtos Perficolor.

INSTRUÇÕES DE USO

• CÓDIGO DO PRODUTO

Todas as peças possuem um código individual. Ele é sempre composto por números e letras. Os primeiros 4 a 6 dígitos do código final são os que identificam a qual peça se faz referência, o “nome”.

Exemplo: 1510XJDAR-BC

Após essa sequência, consta a direção* ou ângulo* de fechamento da peça, presente em produtos específicos, não sendo aplicável em todos os códigos. Quando necessária a indicação de direção utiliza-se a letra D para indicar direita e E para esquerda.

Exemplo: 1510XJDAR-BC

A terceira parte que constitui o código é destinado à marca da máquina de fechadura (peças revendidas pela Perficolor) ou ângulo para contra dobradiça. A marca aplica-se apenas ao grupo fechaduras e o ângulo ao grupo dobradiças.

Exemplo: 1510XJDAR-BC

A quarta e última parte do código final de todas as peças indica a cor. Desta forma utilizam-se duas letras para designar o nome da cor a qual se refere, melhor especificadas no quadro de abreviaturas.

Exemplo: 1510XJDAR-BC

• QUADRO DE ABREVIÇÕES

BC: Branco	DT: Desenho Técnico
PT: Preto	AR: Arouca
MR: Marrom	FR: Franzmar
PO: Polido	3F: Máquina 3f
MT: Metálico	SP: Soprano
E: Esquerda	VV: Vidro/Vidro
D: Direita	VA: Vidro/Alvenaria
BZ: Bronze	

Exceção: Algumas peças têm tamanhos variáveis, como largura, altura e diâmetro. Tendo em vista essas especificidades, constam no final da descrição dos produtos ao longo do catálogo, tabelas com a indicação dessas medidas e o código final gerado - uma vez que este foge a regra geral de formação de códigos.

* Algumas peças possuem direção direita ou esquerda melhor explicadas no subtítulo Direção de Fechamento abaixo. Já outras também são diferenciadas pelo ângulo de sua estrutura.

• DIREÇÃO DE FECHAMENTO

Algumas peças se diferem umas das outras apenas pela direção de fechamento para a qual foram projetadas. É o caso das fechaduras de portas e janelas. Neste catálogo foram representadas apenas peças direitas para facilitar o entendimento.

Para uma melhor interpretação dessas especificações, ilustra-se abaixo como identificar os dois casos de diferentes direcionamentos das peças.

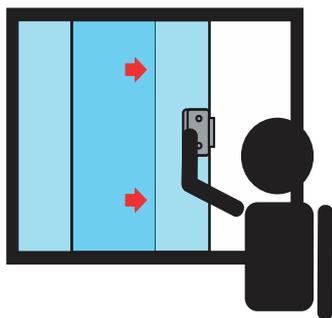

PORTAS E/OU JANELAS DE CORRER

Esquerda: imaginando-se no ambiente interno, quando fecha-se o vidro deslizando-o da esquerda para a direita, refere-se à uma fechadura esquerda (segura-se com a mão esquerda na fechadura para fechar).

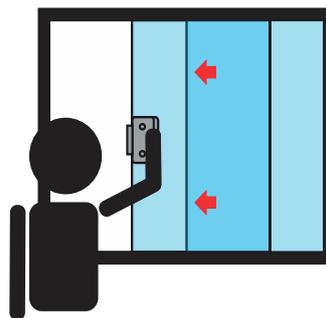

Direita: imaginando-se dentro do ambiente interno, quando fecha-se o vidro deslizando-o da direita para a esquerda, refere-se à de uma fechadura direita (segura-se com a mão direita na fechadura para fechar).

INSTRUÇÕES

Fechadura **direita**

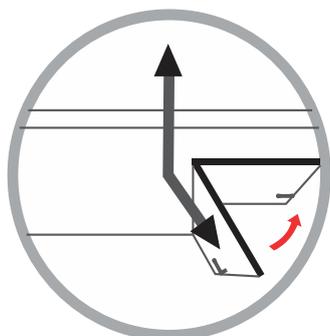

Fechadura **esquerda**

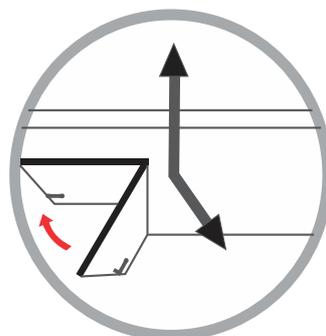

PORTAS E/OU JANELAS DE CORRER

Direita: imaginando-se no ambiente interno, quando fecha-se o vidro deslizando-o da sua esquerda para a sua direita, refere-se à uma fechadura direita (segura-se com a mão esquerda na fechadura para fechar)

Esquerda: imaginando-se no ambiente interno, quando fecha-se o vidro deslizando-o da sua direita para a sua esquerda, refere-se à uma fechadura esquerda (segura-se com a mão direita na fechadura para fechar)

Fechamento da porta
no **sentido anti horário**
Fechadura **esquerda**

Fechamento da porta
no **sentido horário**
Fechadura **direita**

PORTAS PIVOTANTES

Esquerda: imaginando-se no ambiente interno, quando fecha-se a porta no sentido anti-horário, refere-se à uma fechadura esquerda (segura com a mão esquerda na fechadura para fechar)

Direita: imaginando-se no ambiente interno, quando fecha-se a porta no sentido anti-horário, refere-se à uma fechadura direita (segura-se com a mão direita na fechadura para fechar)

CONJUNTOS

Para facilitar o entendimento e localização das peças no catálogo, algumas peças foram representadas em grupos, ocupando o mesmo local na revista. Como exemplo tem-se as fechaduras e contra fechaduras, as quais são ilustradas e descritas em conjunto. Para que fossem melhor diferenciadas, o código e nome das peças foram destacados quanto a cor: azul para peça A e preto para peça B. Essa diferenciação também está presente nos desenhos técnicos, onde identifica-se as peças em A ou B e pelas cores azul (A) e cinza (B).

• INDICAÇÕES DE USO

Na ilustração abaixo pode-se visualizar e melhor compreender como essas informações estão dispostas no decorrer desta revista.

The diagram shows the layout of product information for a specific item. It includes a code and name, a product image, a technical drawing of the cutout, an application diagram, and a specifications table.
